

Project Navigator

Web Application
Record Locking User Guide

May 2026

By David Egan

**Software
Version 4.0**

This guide explains how project & user account record locking works within the Projects Navigator, what actions trigger a lock, and how users will experience locked records.

1. What Triggers a Project Record Lock

When a user clicks either the 'Edit Project' or 'Delete Project' button, the selected project record is immediately locked as shown in fig 1.

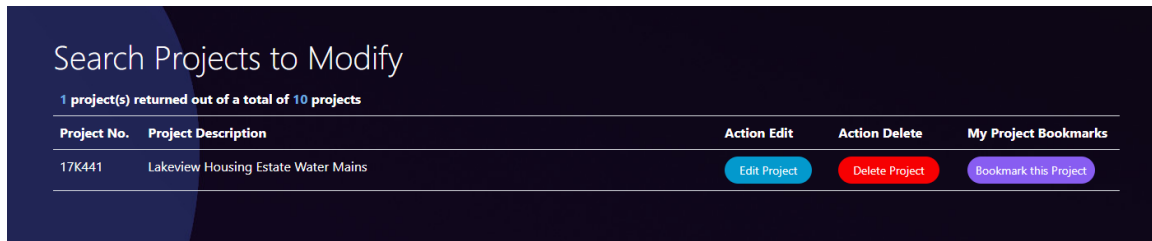

Figure 1

2. Project Record Lock Notification

Once a project record is locked, all users (including the user who initiated the lock if the user locked the record to himself/herself) will see a notification dialog as shown in fig 2 when attempting to access the project

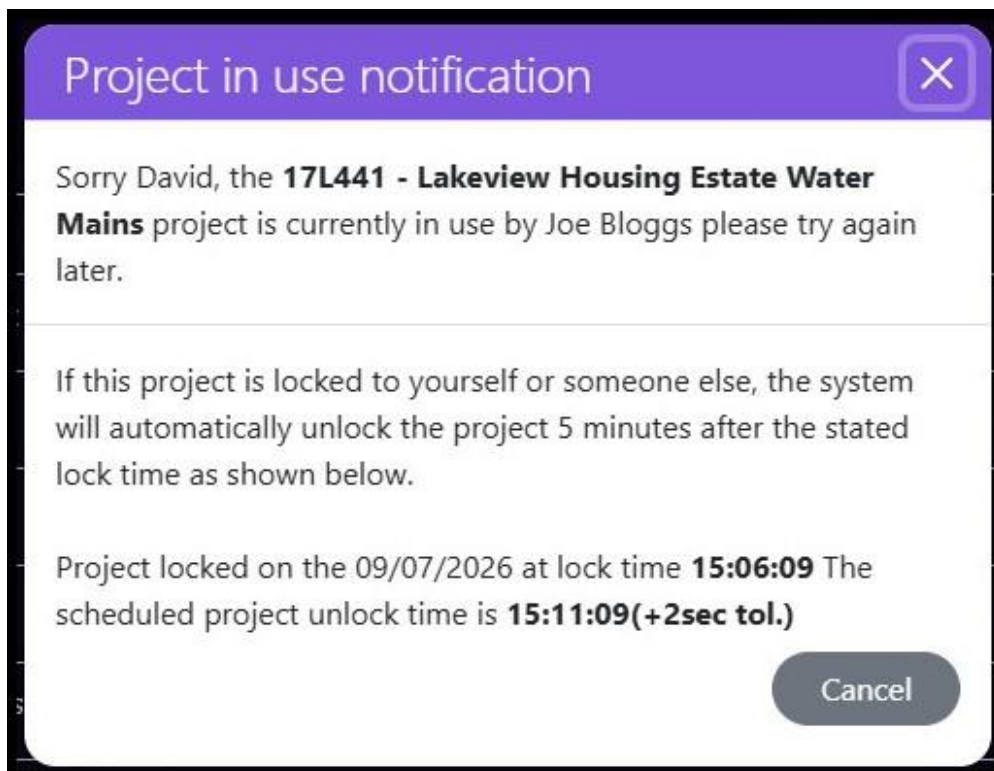

Figure 2

The dialog shows who locked the record, when it was locked, and when it will be unlocked.

3. Project Restricted Actions During Lock

If a project record is locked and a user clicks any of the following actions as shown in fig3 & 4, the lock notification dialog will be displayed as shown in fig2:

- Open Directory
- Open Email
- Bookmark this Project

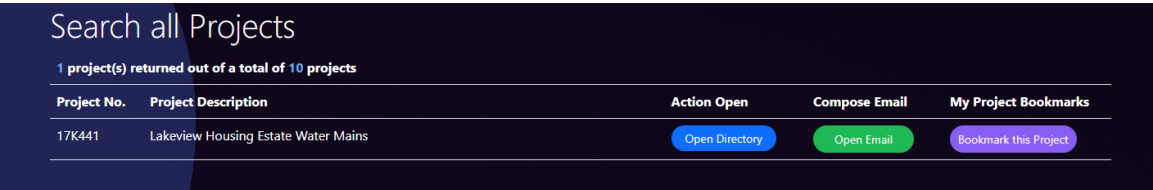

Figure 3

- Edit Project
- Delete Project
- Bookmark this Project

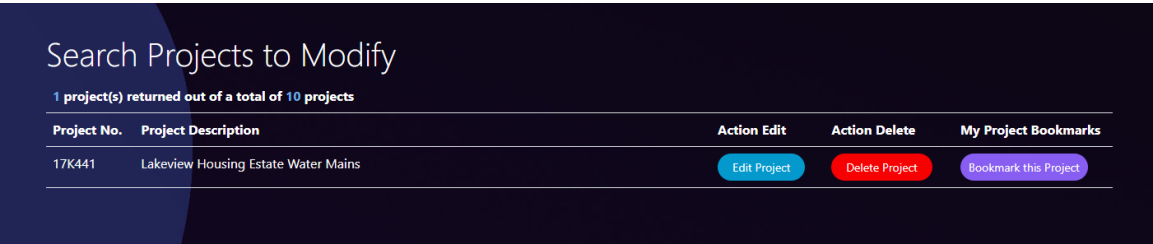

Figure 4

4. Automatic Project Record Unlocking

Locked project records are automatically unlocked after a set period (e.g., 5 minutes). Users must wait until the lock expires before accessing the project. The Enola servers unlock the project records automatically. Refer to the Enola user guide.

5. What Triggers a User Account Record Lock

When a user clicks either the 'Edit User' or 'Delete User' button, the selected user account record is immediately locked as shown in fig 5.

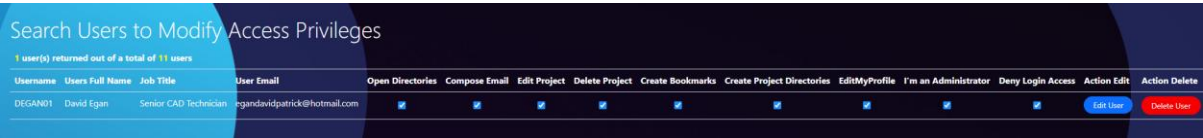

Figure 5

6. User Account Record Lock Notification

Once a user account record is locked, all users (including the user who initiated the lock if the user locked the record to himself/herself) will see a notification dialog as shown in fig 6 when attempting to access the user account.

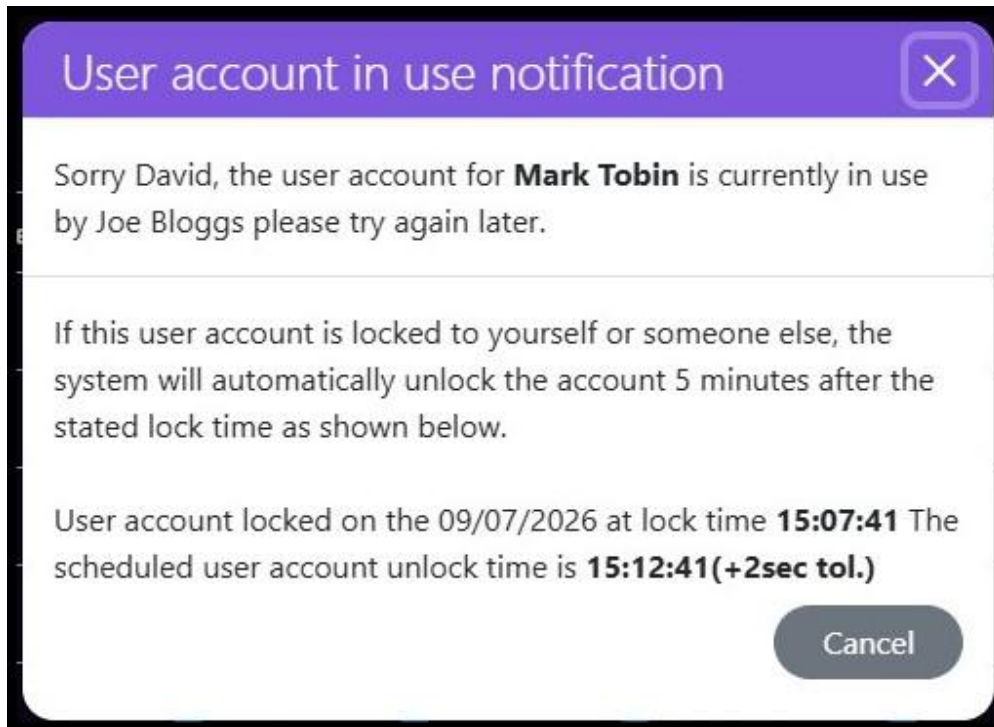

Figure 6

The dialog shows who locked the record, when it was locked, and when it will be unlocked.

7. User Account Restricted Actions During Lock

If a user account record is locked and a user clicks any of the following actions as shown in fig7, the lock notification dialog will be displayed as shown in fig6:

- Edit User
- Delete User

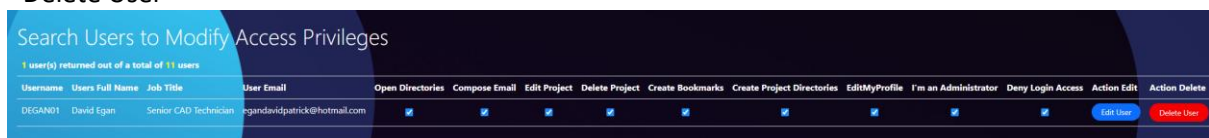

Figure 7

8. Automatic User Account Record Unlocking

Locked user account records are automatically unlocked after a set period (e.g., 5 minutes). Users must wait until the lock expires before accessing the user account. The Enola servers unlock the user account records automatically. Refer to the Enola user guide.
