Does Your Company's Projects Directory Structure Align with the Project Navigator Web Application Workflow?

The Multi-User Projects Navigator is not a one-size-fits-all solution. Every company has its own directory file structure system, and the application would need to be reprogrammed to accommodate your specific format. Project directory structure is equally important and must align with how your company organises its work on disk. A typical structure in the AEC (Architectural, Engineering & Construction) industry might look like this:

All projects and directories shown below are fictitious. No client data is displayed.

P:\2017 Projects

- |— [17L441 Lakeview Housing Estate Water Mains]
 - | |— 00_README.txt
 - | |— 01_WIP
 - | |— 02_SHARED
 - | |— 03_PUBLISHED
 - | |— 04_ARCHIVE
 - | |— 05_RESOURCES
 - | |— 06_INCOMING
- |— [17L094 Cathedral Quarter LED Lighting Retrofit]
 - | |— 00_README.txt
 - | |— 01_WIP
 - | |— 02_SHARED
 - | |— 03_PUBLISHED
 - | |— 04_ARCHIVE
 - | |— 05_RESOURCES
 - | |— 06_INCOMING
- |— 17L003 The Third Project
- |— 17L010 The Tenth Project
- |— 17L100 The Hundredth Project

P:\2019 Projects

- |— [19L233 Oaklands School Fire Alarm Installation]
 - | |— 00_README.txt

 - | |— 06_INCOMING
- |— 19L003 The Third Project
- |— 19L010 The Tenth Project
- |— 19L100 The Hundredth Project

This directory structure, or minor variants as defined above, is key and is critical to integrating the Multi-User Projects Navigator into your workflow. It may be that your company's directory structure does not comply with the above naming convention. If not, renaming your project directories to comply may be the only option if you want the Multi-User Projects Navigator to manage them for you. Not a light undertaking if you have thousands of existing project directories to rename. The

Multi-User Projects Navigator displays your projects in project number descending order. The most recent project numbers are at the top and the older project numbers appearing down the list. I can assist with the population of your existing projects into the application — the real value of the platform is realised when all of your projects are installed. At that point the tool becomes invaluable to everyone who uses it: CEOs, Managing Directors, Engineers, BIM Managers, CAD Technicians, and Administration Staff — essentially anyone who needs to find and access centralised project directories quickly.

If renaming your directories is not a feasible option for your company, we can implement the above directory structure starting today moving forward.

When a user clicks the Open Directory button, the project directory — whether it resides on the file server in your office or on OneDrive — opens directly in File Explorer, giving instant access to all project files without navigating through directory hierarchies manually.

No longer is finding a project an arduous or time-consuming task — and no longer is it a hit-and-miss exercise. With the Multi-User Projects Navigator, any project in the system can be found in seconds. No guesswork, no wasted time, no hit or miss to it. If a project isn't in the system, it can't be found.
