Projects Catalogue Web Application
Record Locking User Guide

May 2026
By David Egan

Software
Version 4.0

This guide explains how record locking works within the Saubon Synogen™ Projects Catalogue, what actions trigger a lock, and how users will experience locked records.

1. What Triggers a Record Lock

When a user clicks either the 'Edit Project' or 'Delete Project' button, the selected project record is immediately locked as shown in fig 1.

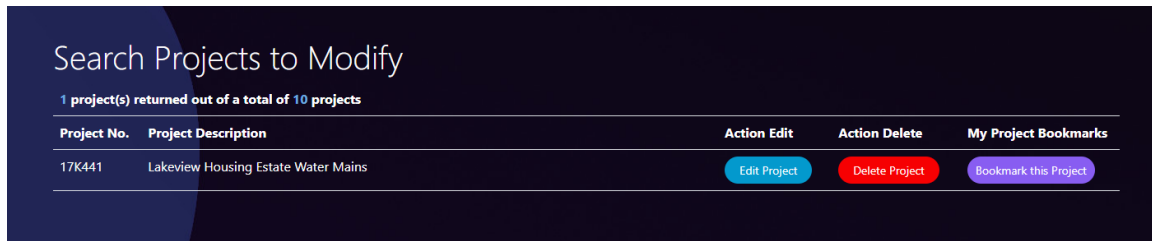

Figure 1

2. Record Lock Notification

Once a record is locked, all users (including the user who initiated the lock if the user locked the record to himself/herself) will see a notification dialog as shown in fig 2 when attempting to access the project.

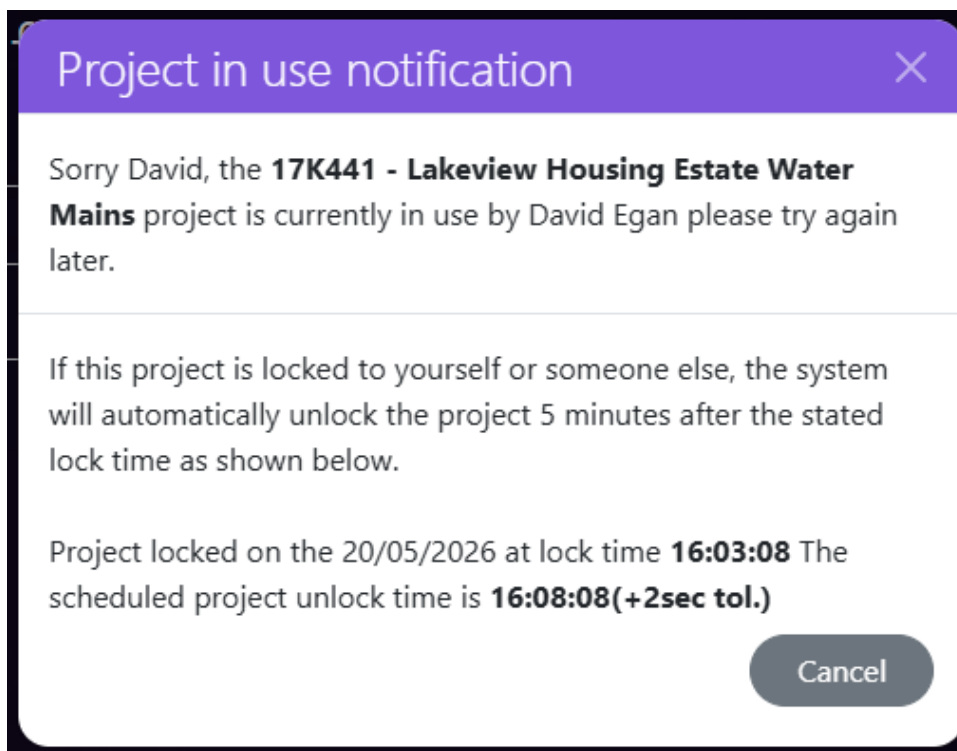

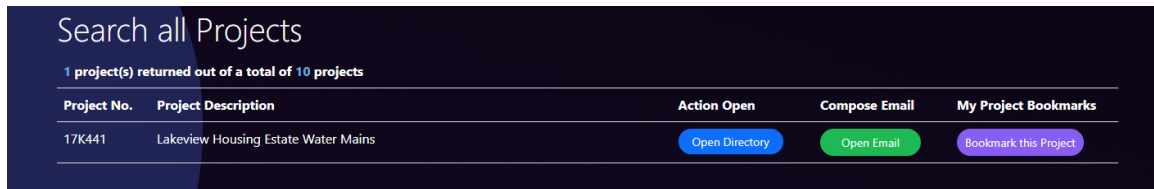

Figure 2

The dialog shows who locked the record, when it was locked, and when it will be unlocked.

3. Restricted Actions During Lock

If a record is locked and a user clicks any of the following actions as shown in fig3 & 4, the lock notification dialog will be displayed as shown in fig2:

- Open Directory
- Open Email
- Bookmark this Project

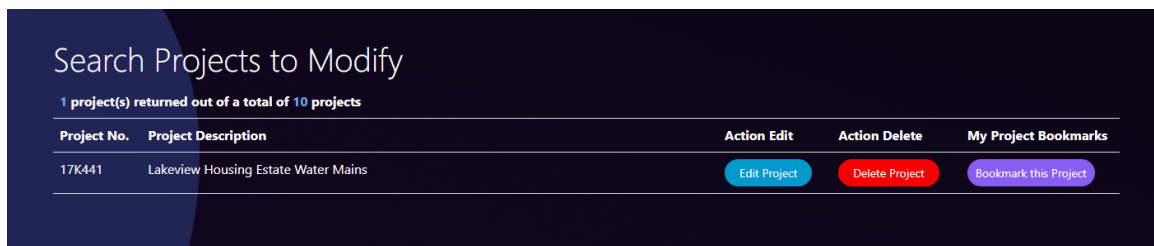

Search all Projects

1 project(s) returned out of a total of 10 projects

Project No.	Project Description	Action Open	Compose Email	My Project Bookmarks
17K441	Lakeview Housing Estate Water Mains	Open Directory	Open Email	Bookmark this Project

4. Automatic Unlocking

Locked records are automatically unlocked after a set period (e.g., 5 minutes). Users must wait until the lock expires before accessing the project.
